

Contract as an Enabler for Change

REVIEW EXISTING CONTRACT

Ensure providers are not restricted in ability to change by current wording in contracts. Ideally you'll be renewing so can do things differently.

Share your thinking with providers and involve them early in designing how blended roles could work in your place

ENGAGE PROVIDERS

METHOD STATEMENT

Signal change and the expectation that successful providers will work with you to develop a new model

Require providers to set out how they see change working in their organisations and what they'll do differently

EVALUATE

CONTRACT

Include a clause stating intention to work together towards a new model
